3-phase electric hydraulic power unit

230V/400V - 60 / 130 / 200 liter tank

A professional powerful hydraulic unit that is extremely suitable for operating machines, hydraulic tools, test rigs, cylinders, hydraulic motors and much more. These power units have multiple standard specifications but can also be customized to your needs. It's also possible to have a unique power unit designed by our engineers.

Specifications

- 3 - 30 kW motor power
- 230V - 400/440/460/690V power supply
- Oil supply: 3-150 l/min
- Pressure 1-350 bar
- Hydraulic tank: 60/130/200 liter
- Motor efficiency: IE1, IE2, IE3, (UL, CE)
- Download 3D step file
- Hydraulic diagram is generated automatically

Possibilities

- Cooling
- Wheels
- Select the pump yourself
- Variable Axial Piston Pump
- Electrical box (soft starter, frequency control)
- Proportional
- Battery pack
- Wireless control
